

Metrop[®]

HOW IT ALL STARTED IN HOLLAND

Years ago Metrop introduced a new generation bio-mineral fertilizers in Holland. After Dutch growers discovered the benefits of Metrop expert fertilizers they saw their harvest increase with 20% to 50% !!

Metrop started more than 20 years ago. Metrop originates from grow enthusiasts that wanted to bring better products to growers. Most growers want to live free and make their own choices in life, with Metrop you can.

OUR PHILOSOPHY

Metrop Dutch fertilizers are made of very, very high quality raw and concentrated ingredients. At Metrop we use only the best Macro (NPK), micro-mineral and chelated trace-elements. Because we use these high quality ingredients from the raw materials Metrop reaches concentrations levels that are ten-times (10X) higher than regular hobby-nutrients. This high quality makes Metrop the 'number 1 choice of professionals'.

METROP BRINGS OUT THE BEST

At Metrop we believe that our customers want the maximum out of their plants, big, heavy buds and crops. The high quality basic materials not only increase plant-health, along with grow and production, but also improves the taste of your buds and crop!

RESEARCH & KNOW-HOW

Metrop fertilizers are different in basic concentrations. For example Metrop promotes a higher concentrate of Phosphor (P) right from the start. The world's leading horticultural University of Wageningen (Holland) research proved that plants need more Phosphor (P) in their grow phase and extra Phosphor (p) together with Potassium(k) in the blooming phase. METROP is a fertilizer that can deliver this high levels of Phosphor(P) & Potassium (K).

PROFESSIONALS

When you open the bottle MR1-grow & MR2-bloom the content is thick, heavy and concentrated. The fertilizers are comparable with green yoghurt. Metrop fertilizers are well balanced and topped with rich elements, All Metrop products can easily be used for all mediums and in each plant grow system. With the richness of macro- and micro- element, there is no need for separate Coco, soil or hydroponic bottles, only the grow schedules varies. Metrop needs to be measured carefully, It is easy to use and gives each grower more freedom to cultivate as they choose. Metrop sets you free. That is why Metrop sets you free:

THE #1 CHOICE OF PROFESSIONALS

CONCENTRATED

Liquid Fertilizers

OUR PRODUCTS

В Metrop използваме най-добрите налични суровини за макро- и микроелементи, някои от които се използват изключително и само от Metrop. Ето защо можем да вложим и да постигнем безпрецедентно високи нива на NPK и микроелементи в нашия тор. С разреждане от 1: 2000, Metrop е 10 пъти по-концентриран от повечето обикновени и просто подхранващи торове, а освен това има уникално високи и балансирани стойности на NPK. Поради това торовете Metrop имат право да носят обозначението на Европейската комисия за ТОРОВЕ. В Metrop ние произвеждаме торове не просто подхранващи вещества за растенията.

В Metrop произвеждаме превъзходно балансирани и най-съвременни торове, подкрепени с международни изследвания. Metrop торовете за разтеж и цъфтеж осигуряват на вашите растения всичко, от което те се нуждаят... и още. В Metrop предлагаме линия от 5 основни продукта, които осигуряват напълно нуждите на вашите растения. Плюс допълнително и специален тор за растения майки, наречен MAM. Основната продуктова линия на Metrop се състои от:

TUTTI I MEDIUM!
GROW MR1 & BLOOM MR2

CALGREEN
FOR AN IMPROVED CELL STRUCTURE

ROOT+
A POWERFUL ROOT ACCELERATOR

AMINOXTREM
BETTER LEAVES, BIGGER PLANTS,
BUDS & HIGHER HARVESTS

MAM
THE ONLY AND BEST FERTILIZER FOR
YOUR MOTHER-PLANTS

www.metrop.net

METROP MR1.

GROW

MR1 is a top & unsurpassed fertilizer, with high NPK biominerals and natural extracts. MR1 fertilizer includes high levels of Phosphorus (P) to create a large root system. The extra Potassium (K) enables each plant to increase in strength & health. Metrop MR1 is biological degradable.

METROP MR2.

CONSISTENT BLOOM POWER

MR2 is the bloom-power fertilizer. The unique combination of NPK, with a PK of 20-40 (w/w PK 16-25), will bring you high yields and the biggest buds ever. The high quality MR2 trace- & micro-elements, like magnesium (MgO) for optimal chlorophyll makes sure your plants will get a bloom explosion!

METROP CALGREEN

FOR AN IMPROVED CELL STRUCTURE

Calgreen compound is an important catalyst for the plantcellwalls and makes durable strong cellwalls that results in more compact, heavier tops. Because your plants are healthy and strong Calgreen provides 80% defence against most moulds, pest and rot diseases.

Calgreen can also be used as the topmost foliar spray.

METROP ROOT+

A POWERFUL ROOT ACCELERATOR

The world's purest and greatest root-product, ROOT+ is a very high-quality nutrient and vitamin accelerator that speeds up and enables additional grow in the root system and stem. Combined with the right fertilizers Metrop ROOT+ allows for beautiful white roots, that have many hair-vessels to soak up energy.

METROP AMINOXTREM

BETTER LEAVES, BIGGER PLANTS,
BUDS & HIGHER HARVESTS

AminoXtrem stimulates an explosive formation of large buds and extensive root grow, it stimulates plant-own hormones in the formation of leaves & tops. AminoXtrem contains unique amino acids produced through "biosynthesis". AminoXtrem combined with Metrop MR2 PK 20-40 (w/w PK 16-25) enhances the process of photosynthesis which provides vast amounts of sugars in the plant-sap.

METROP MAM

THE ONLY AND BEST FERTILIZER
FOR YOUR MOTHER-PLANTS

MAM is the first and only fertilizer developed especially for mother plants. The NPK and micro-elements balance is composed to produce a healthy and huge clone production from your Mother-plant. MAM provides you with cuttings that are resilient, more vibrant and healthier, resulting in great cuttings that can be stored longer.
